Summary

System Analyst with 3+ years across system analysis, product management, and software engineering. Translates business requirements into UML models, API specifications, database designs, and developer-ready documentation for banking platforms including Kopra by Mandiri and BRImo. Fullstack background in Laravel, React, Next.js, and Spring Boot.

Work Experience

System Analyst **Jul 2026 – Present**

PT Bank Mandiri (Persero) Tbk | Contract | Squad 9, UDC project

- Designed requirements for **5 transfer and payroll products** with Product Owners, covering domestic and international flows
- Specified **40 APIs** (13 new, 27 enhanced), 3 database tables, and 1 batch process
- Wrote **188 website screen specifications** and 12 report templates in Confluence
- Raised **307 Jira tickets** across 86 parent items and 3 releases, including 276 frontend and backend sub-tasks
- Traced **68 bug and problem tickets** through Kibana logs to their root cause, including 1 production issue
- Ran internal testing on features before delivery to the testing team

Junior Product Manager **Apr 2025 – Aug 2025**

Diksha Technologies | Contract, placed at BRI | BRImo mobile banking application

- Authored **8+ Product Requirement Documents (PRDs)** for transaction and payment features, used by engineering and QA teams
- Designed **3+ end-to-end user flows** for payments and benchmarked peer mobile banking apps to inform prioritization
- Defined acceptance criteria and managed Jira tickets, taking features through User Acceptance Testing (UAT)

System Analyst **Mar 2025 – May 2025**

Diksha Technologies | Contract, placed at BRI

- Designed UML diagrams (Activity, Sequence, and ERD) to support system development and technical documentation
- Refined business requirements with Product Owners and reviewed implementation and data mapping with developers
- Created and managed Postman collections for API documentation, testing, and integration

System Analyst **Mar 2024 – Mar 2025**

PT Indocyber Global Teknologi | Contract, placed at Bank Mandiri | Kopra by Mandiri (SCM and MGT squads)

- Designed API specifications and database table designs that gave developers clear technical direction
- Worked with **6 Product Owners** to translate business requirements into application requirements and system solutions
- Documented **300+ web screens** as detailed references for a team of 4–6 developers
- Analyzed and triaged bugs to their root cause, providing clear reproduction steps and fix guidance
- Created and tracked **1,200+ Jira tickets** covering development tasks, bug reports, and feature requests

Junior Software Engineer **Feb 2023 – Feb 2024**

PT Unggul Mitra Solusi | Full-time

- Developed **10+ features across 5 ERP modules** (Finance, Purchase, Sales, Accounting, Stock) using Laravel, React.js, and Next.js
- Built and maintained **30+ REST APIs**, tested and validated with Postman
- Reviewed system flows before new features to assess impact on existing modules and prevent regressions

Web Developer Intern **Feb 2022 – Feb 2023**

PHINCON | Internship

- Contributed to 2 enterprise systems (ERP and CRM), building REST APIs and fixing bugs with Java Spring Boot and Angular

Skills

Analysis: Requirements Gathering, Business Analysis, UML, ERD, API Specification, Database Design, Data Mapping, User Flows, PRDs, Acceptance Criteria, UAT, Root Cause Analysis

Tools: Jira, Confluence, Kibana, Postman, Git

Development: Java, Spring Boot, PHP, Laravel, JavaScript, TypeScript, React.js, Next.js, Angular, Express, Golang, MySQL, MongoDB

Languages: Indonesian (Native), English (Conversational), Mandarin (Conversational)

Education

Mandarin Language (Non-degree), Zhejiang University, China **Sep 2025 – Jul 2026**

Bachelor's Degree in Computer Science, BINUS University, GPA 3.55/4.00 **Sep 2019 – Sep 2023**

Certifications

DIGDAYA Essential, Practitioner, and Capstone Project (LPPI, 2026); Belajar Dasar UX Design and Belajar Dasar Data Science (Dicoding, 2026)
